

MAURITIUS ISLAND

NEW GROVE

R U M

The story of rum is intimately linked to the history of Mauritius.
And when you savour rum, you are delving into the very heart of the island's destiny, carried away on the exhalations of an **ancient tradition**, rediscovering the taste of **authenticity**...

Heritage and quality make up the quintessence of New Grove.

These **Single Estate rums** are made from the savoir-faire of the **first distillery in Mauritius** and truly characterize the spirit of the island: Authentic, warm and welcoming.

Expressive, subtle or with sweetness, New Grove rums suit all tastes and can be enjoyed neat, on ice, or with your favorite cocktail.

MAURITIUS ISLAND

NEW GROVE

RUM

grays

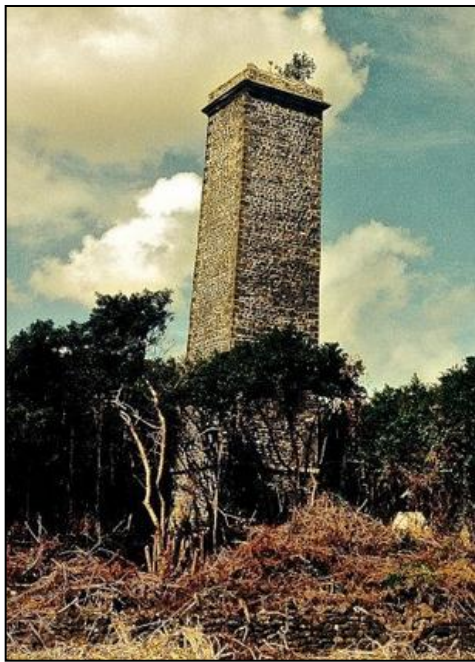

Member of the Terra Group, with a staff of more than 500 people, Grays fosters its reputation with powerful brands and a large distribution network. Grays is the pioneer of distillation in Mauritius and produces nearly 7 million litres of pure alcohol per year, with a daily production capacity of about 30,000 litres. By the means of its wide network of cellars, 20/vins, Grays' wines and spirits can be found all around Mauritius. Thanks to its exports towards Europe, Asia, Africa and America Grays is now a well known brand, worldwide.

www.grays.mu

The sugar cane harvest starts in June, every year. From Terra, covering over 17,500 acres, only the finest cane of the best plots of the Domaine is selected to seize the essential element in the concoction of our traditional rum: molasses.

Benefiting from experts' input, natural flavours resulting from the distillation, collected from the 37 distillation column trays, will produce the rum. A first draft of rum comes out with 94% of alcohol, then diluted at 65% for ageing.

Oak barrels from the Limousin, France, will then do their work, slowly and patiently ageing rum – which will give all its flavour, its softness, and its distinctive amber tan. New Grove uses 30% new French Oak barrels and 70% old French oak barrel and Cognac barrels. Grays was able to create a unique Mauritian rum that meets the international standards of high quality rums: New Grove. www.newgroverum.mu

MAURITIUS ISLAND
NEW GROVE
RUM

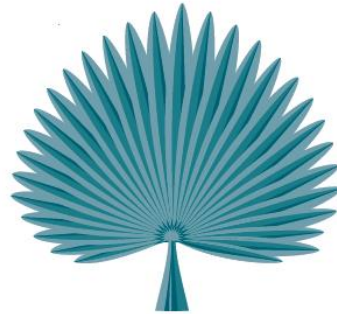

Mahe de Labourdonnais transmitted to Mauritius the French “savoir-faire” in industrial development.

The Domaine de La Villebague, in the village of Pamplemousses, was the home for the first sugar mill of the island in 1740 and soon after, in 1742, the first rum distillery would come to light.

Thanks to Pierre Charles Harel, born in 1806, distillation techniques improved massively along with the legal framework.

The Domaine de La Villebague is still owned by his heirs who created the company GRAYS INC LTD, who sustain the tradition and produce the New Grove Rum, which exclusiveness lies on the land that once saw the first and only distillery & sugar mill, at the time of the “East India Company”.

RUM

Latanier bleu

Latania loddigesii is a species of palm tree. It is endemic to Mauritius, where the only remaining populations are located mostly on the offshore islands.

It is also grown as an ornamental plant. Its common names include Latanier de l'Île Ronde and Latanier de Maurice.

It all started with arrack

On the isolated islands, only arrack would comfort the sailors and forget about their hard and lonely lives, travelling the remote seas. Initially, arrack was a spirit made out of latanier leaves brew.
